

1 ABSTRACT OF THE DISCLOSURE

2 A horizontal band saw includes a base assembly, a sawing mechanism
3 and a bevel cutting adjustment device. The base assembly includes a frame and a
4 conveyer. The frame has a transverse passage. The conveyer is mounted in the
5 transverse passage of the frame. The sawing mechanism is pivotally mounted on
6 the frame and includes a housing. The housing is pivotally mounted on the frame
7 and has a bottom and a cutting window above the conveyer. The bevel cutting
8 adjustment device is mounted on the frame, connects to the bottom of the
9 housing and is used to pivot the sawing mechanism relative to the conveyer so
10 that the horizontal band saw can make a bevel cut in a workpiece.
